The Youth Employment Programme and Skills and Employability Branch are organizing a regional workshop on the theme of enhancing youth employability and easing labour market transitions. This three-day interregional event is part of a series of 'What Works in Youth Employment' Knowledge Sharing Events to facilitate learning and dialogue through evidence-based 'good practices'. The objective of the workshop is to bring together stakeholders (including our tripartite constituents) from nine African countries (Côte d'Ivoire, Ethiopia, Kenya, Nigeria, Rwanda, Senegal, Sudan, Tanzania, and Zambia) in an interactive forum for exchange and peer learning with guidance from technical experts on effective, replicable and scalable supply side initiatives that address employability, skills demand, anticipation of skills needs and the bridges between supply and demand. A report based on exchanges and lessons learned during the workshop will be produced.
