European synthesis report This report provides an update on the state of play regarding 'green skills' and 'green jobs' in six EU countries (Denmark, Germany, Spain, Estonia, France and the UK). It examines the major changes in green jobs and employment since 2010, and analyses the regulations and policies supporting green skills and employment, including the surrounding institutional set-up and the role played by social partners. It also highlights good practices, including green skill anticipation mechanisms, relevant vocational education and training and higher education, active labour market policies and retraining measures, and the role of the private sector.
