The State of European Tech report is a comprehensive and data-driven portrait of Europe's technology ecosystem. Europe is building a tech ecosystem in its own image, defined by deep tech expertise, incredible geographic diversification, and a uniquely collaborative approach with traditional industry. Talent is a defining factor of many companies and sectors, technology is no different. The third chapter of this report looks at how strong is the tech talent pipeline in Europe, how concentrated is it and how competitive is it getting. It provides great insights, trends, statistics and geography of tech talent in Europe.
