Full, productive and decent employment for all is a priority area for the government of Pakistan. The availability of relevant and up-to-date information is a pre-requisite to promote opportunities for women and men to obtain decent and productive employment in conditions of freedom, equity, security and human dignity. Pakistan Employment Trends 2011 is a comprehensive report regarding progress towards achieving Millennium Development Goals target 1b “full and productive employment and decent work for all”. In this report, both quantitative and qualitative aspects of existing employment in the country have been analyzed as well as its comparability in the region. This report provides information for making necessary national policies for the creation of quality employment to perform decent work in Pakistan. Efforts have been made to make this report a comprehensive, informative and useful document for decision-makers, researchers, planners, economists and other beneficiaries at large. Suggestions are, however, welcome for its further improvement.
