Qatar National Vision 2030 builds on a society that promotes justice, benevolence and equality. It embodies the principles of the Permanent Constitution, which protects public and personal freedoms, promotes moral and religious values and traditions, and guarantees security, stability and equal opportunities. In line with these principles, Qatar National Vision 2030 rests on four pillars: Human development—to enable all of Qatar’s people to sustain a prosperous society. Social development—to maintain a just and caring society based on high moral standards and capable of playing a prominent role in the global partnership for development. Economic development—to achieve a competitive and diversified economy capable of meeting the needs of, and securing a high standard of living for, all its people for the present and for the future. Environmental development—to ensure harmony among economic growth, social development and environmental protection.
