This document is one of a collection of notes about public employment services in selected Latin American and Caribbean countries. Costa Rica is a small middle-income country in Central America that has experienced low but stable economic growth since 2009. This growth has been associated with the development of relatively skill-intensive industry niches, including information technology, tourism and medical equipment, in line with improvements in labour force educational levels. This note provides an overview of the main trends and innovations of the Public Employment Services in Costa Rica.
