The OECD Skills Strategy provides a useful framework for countries to build effective and integrated skills policies that develop relevant skills, activate skills supply and make effective use of skills. Norway is the first country to undertake a collaborative project with the OECD with the aim of applying the OECD Skills Strategy in practice. This diagnostic report identifies 12 skills challenges for Norway which were distilled from a series of interactive diagnostic workshops held with a range of stakeholders. It marshals a wide array of relevant OECD evidence, including Norway's results from the Survey of Adults Skills (PIAAC), to shed further light on these challenges. Finally, it offers some concrete examples of how other countries are tackling similar skills challenges.
