Skills Innovation Facility - 17 May 2024

Recognizing the importance of innovation for the renewed calls for lifelong learning, the ILO has initiated the development of a Skills Innovation Facility. The Facility identifies and tests promising and innovative ideas and solutions that address the major skills challenges of today and of tomorrow.

Skills systems are confronted by the need to respond to increasingly dynamic and fluid labour market and societal conditions. Climate change, technology, demographic shifts, migration and globalization are causing increasing disruption to the world of work, while making skills development increasingly complex, fluid and

unpredictable. Addressing contemporary skills challenges requires more dynamic and integrated skills and lifelong learning ecosystems.

Recognizing the importance of innovation for the renewed calls for lifelong learning, the ILO has initiated the development of a Skills Innovation Facility. The Facility identifies and tests promising and innovative ideas and solutions that address the major skills challenges of today and of tomorrow.
