Updated estimates and analysis

The fifth monitor presents three scenarios for recovery in the second half of 2020: baseline, pessimistic and optimistic. It stresses that the long-term outcome will depend on the future trajectory of the pandemic and government policy choices. The Monitor also finds that women workers have been disproportionately affected by the pandemic, creating a risk that some of the modest progress on gender equality made in recent decades will be lost, and that work-related gender inequalities will be exacerbated.
